Aruba - New Mid-Profile Shaker Door Style

"A new shaker option that fills the gap between Fairmont/Bella & Nassau/Atlantis"

Integrity Cabinets is introducing Aruba, a new mid-profile shaker door style designed to bridge the gap between our Standard Shaker (Fairmont/Bella) and Skinny Shaker (Nassau/Atlantis) offerings. This addition gives dealers a strategic middle option to meet diverse customer preferences and project requirements.

Aruba features mortise and tenon construction with 1 3/4" rails and stiles, available in Maple, MDF, and White Oak. The door style is Price Group 2 and comes standard with slab drawer fronts, with 5-piece drawer front upgrades available. Aruba is available to order now for delivery starting April 1, 2026. This expanded shaker selection strengthens your ability to offer customers precisely the aesthetic they're seeking while maintaining the quality standards your projects demand.
